

Auma India commenced its operations 25 years ago in Peenya, Bangalore in a small way. From this beginning Auma India has gained strength year after year. Today Auma India is proud of the fact that its products are being used in almost all the projects in India in the field of Power generation, Cement and Steel manufacturing, Water supply and treatment, Oil refineries etc. This has been possible due to continued support of our customers.

On this occasion, Auma India launches **Infaumation**, a quarterly newsletter for effective communication with its customers. Through this newsletter, we shall share developments in the products, projects and manufacturing area with our customers.

Auma India Manufacturing Unit at Peenya

## Message from the Desk of the Managing Director

Auma India is committed to serving its customers by offering a wide range of products to meet varying requirements of torque generation. We have got exceptional support from our customers, which has helped us tremendously in our growth. We thank our customers for putting their faith in us.

Arvind K. Goel, MD, Auma India

## Acquisition of Adjoining Property

Auma India has acquired the neighboring plant earlier belonging to M/s Arvind Mills with an area of 93000 sq.ft and built up area of 60000 sq.ft, which will help Auma India to increase its production capacity in a significant way. We expect to renovate these facilities in the next few months for future expansion plans.

Property acquired by Auma India

## Customer Focus - Auma's Mantra

Auma India has been developing and launching products to meet the varied needs of its customers. In fact, Auma India can virtually meet almost all the requirements of torque generation. Extensive in-house manufacturing capability enables Auma India to provide specific purpose solutions for every need. Recently, Auma India has developed and supplied bevel gearbox model GK 40.1, which can develop maximum output torque of 16000Nm and thrust load of 1375kN. This gearbox can be coupled with Auma India multi-turn actuators, SA 100/ SA 25.1 for electric operations.

Auma India has developed High Torque Actuators capable of generating torque up to 16000 Nm for direct actuation with or without Integral starters, which have been approved by BHEL, Trichy-Valve Division.

### Auma India Exports Gearboxes to China

Gearboxes ready for export to China

### Quality First

Auma India believes in building quality products for long-term trouble-free operations in the field. Auma India has recently installed a motorized CMM (Co-ordinate Measuring Machine) for accurate measurement. Auma India has also acquired a Surface Roughness Tester of Taylor Hobson make, for measuring surface roughness of machined and ground surfaces.

Co-ordinate Measuring Machine

### Auma India Gets ISO Certification Renewed

Auma India has been an ISO certified company since 1995. This certification has been renewed for next three years (2008-2011) by TuV India Pvt. Ltd.

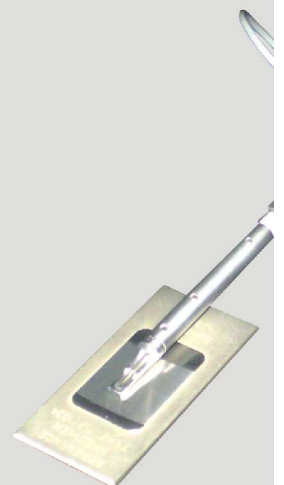

### New Look of Auma India Website

Auma India has revamped its website, [www.auma.co.in](http://www.auma.co.in) to give detailed and easy product information access to its customers. Customers can get the required information about Auma India products and news updates on the website.

### Supporting Customers at Site

Auma India has its service engineers located in different parts of the country for prompt response to customer's service requirements. In case of any need of support, customers can directly send emails to the service department on [service@uma.co.in](mailto:service@uma.co.in) giving details regarding services required. Now Auma India service network has trained service personnel located at the following locations:

- Bangalore
- Pune
- Delhi
- Hospet (Karnataka)
- Bhopal (M P)
- Dhanbad (Jharkhand)
- Talcher (Orissa)
- Sambalpur (Orissa)
- Rourkela (Orissa)

PLC Controlled - Test Rig

Auma India has installed 2 new actuator and gearbox test rigs this year which use PLC/SEMATIC NET. It has significantly enhanced its capability for routine functional testing of its products and life cycle/endurance testing.

## Auma India Supplies Actuators for BPCL, Rajbandh Terminal Automation Project

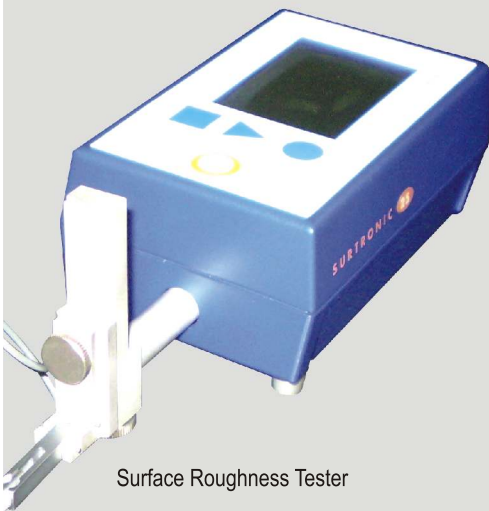

Auma India has supplied a number of actuators for BPCL Marketing Terminal Automation Project in Rajbandh, West Bengal. These actuators are incorporated with field-bus for operations through DCS and were thoroughly tested for compatibility before approval.

## Nuclear Actuators Provided by Auma India

Auma India is the only approved manufacturer of actuators in India for use in Nuclear Power Plants in the **inside containment area**. Auma India has recently supplied nuclear actuators to Kaiga Generating Station and Rajasthan Atomic Power Plant.

## Auma India Wins an Order for Actuators with K-Mass Protection

Auma India has won an order to supply actuators with K-Mass protection from a number of vendors for BPCL Oman Refinery at Bina. These Actuators can work under extreme conditions of fire in the surrounding area (in an emergency) for up to 30 minutes.

## Customer Training at Auma India

Auma India conducts customer training programs periodically at its Works at Bangalore. These training programs provide theoretical knowledge with hands on experience. Auma India conducted three training programs this year in June, August and October, which were attended by equipment makers and end users from all over India. The next program is scheduled during 8-10 Jan 2009.

To participate in this training session, customers can contact Auma India service department on [service@auma.co.in](mailto:service@auma.co.in)

Customer Training conducted on 7-9 Aug 2008

## Auma India Joins Hands with ISKCON in Akshaya Patra Service

Auma India as a part of corporate social responsibility activity has provided a food distribution van to ISKCON for 'Akshaya Patra' service, which provides mid-day meals to needy school children. This van distributes free meals for the schools in Bangalore.

Van provided by Auma India to ISKCON for Akshaya Patra Service.
