THINK AUTOMATION. THINK AUMA

The controlling centre behind all Industrial Valves

AUMA India is the Leader in the field of Electric Actuators and Valve Gearboxes for the automation of Industrial valves and dampers in the country. Be it power, nuclear, water, petroleum, cement or steel, AUMA India actuators are at work behind the scenes, controlling some of the most critical processes in industry.

AUMA India Pvt. Ltd.

Head Office & Works

'Getting connected to our customers through Infaumation window'

AUMA India actuators at various water treatment Schemes across Karnataka

Photo Courtesy :- BWSSB

Water is an important basic need and providing treated water for domestic, commercial and industrial use has become a critical requirement. Auma India actuators are preferred choice in the water treatment plants and are at work across major projects in the country. Auma is supplying more than 100 actuators for water treatment plants across Karnataka for various water schemes.

AUMA India actuators across various terminals of BPCL

Auma actuators are present across the major terminals of oil marketing companies in India. Recently, Auma actuators and gearboxes have been selected for marketing terminals of BPCL across the country.

Auma actuators are a significant component in most of the thermal power plant in the country. With the emphasis on pollution control and decision to equip thermal power plants with Flue-Gas Desulphurization (FGD) units, Auma is proud to be selected to supply actuators for FGD unit being put up at 660 MW thermal power plant at Ennore owned by TANGEDCO. Earlier Auma was selected by NTPC Dadri to supply gearbox and electric actuators. Auma is supplying actuators with SIL-2 capabilities for this application.

Salt Spray Testing Facility

Auma India has commissioned a Cyclic Corrosive test (CCT) chamber at its facility at Bangalore. This equipment conforms to International Standard ISO 9227 and can test the products in the temperature range of 35°C to 60°C and a pH level of 6.5 to 7.2. Products are continuously nebulized with a 5% saline solution at a controlled pH level to test the corrosive resistance and quality of the surface coating. Products are routinely checked in-house to ensure the quality of the coating to meet the standards.

Customer inspection and test facility

Many end-users and EPCs require pre-dispatch inspection of products as per applicable standards. Now Auma India has created a full fledged testing facility in a dedicated space where customer representatives can carry out these tests. This facility is equipped with two actuator test rigs, one high voltage test rig and a crane for product handling. Sufficient space is provided for visiting inspectors without any disturbance from regular manufacturing activities.

Auma India- Service & Demo Lab

Auma India believes in transparently sharing knowledge with its customers so that they can make most effective use of its products. To achieve this, Auma India conducts a three day workshop every quarter which is open to consultants, valve manufactures, EPCs and end-users. These workshops are being conducted for over 20 years and have been immensely beneficial to the organizations, who have deputed their employees to attend these workshop.

During these workshops, classroom sessions are conducted on sizing and selection, basics of actuators and gearboxes, dos and don'ts and troubleshooting. Relevant case studies are also shared with participants for better understanding. Besides classroom sessions, practical session are also conducted where attendees have the opportunity of disassembly and reassembling of products. Auma products are mounted on different valves to show the operation of the products.

Now, Auma India has created a 114 sqm dedicated training center for conducting these workshop. Registration of up to 40 participants is done on first come basis.

The program is suitable for Operation, Instrumentation, Mechanical, and Electrical Maintenance personnel. The training is offered throughout the year as per the Scheduled Training Program Calendar. In addition to this, there is a continuous In-house training program to update on the skill of Service Engineers on the newly released products.

TRAINING CYCLE NUMBER	TRAINING START DATE	TRAINING END DATE
1	25-04-2019	27-04-2019
2	11-07-2019	13-07-2019
3	22-10-2019	24-10-2019
4	21-01-2020	23-01-2020

AUMA India - In-house Customer Service Training Programme

A 3 - day In-house Customer Service training program, was organized by Auma India during 22nd to 24th Jan 2019, which was attended by the delegates from various end -users viz, BPCL-Kochi, NTPC- Kudgi, JSW Steel Toranagal. The training program was aimed at imparting the theoretical know-how along with the demonstration of Auma Products.

AUMA India Collaborates with Multiple NGOs for Social Development

Supporting social causes has been a way of life at Auma India, even before CSR became a statutory requirement. Auma India regularly supports NGOs who are tirelessly working towards upliftment of underprivileged sections of the society. Recently Auma India identified a number of projects with these NGOs and provided appropriate resources.

Some of the activities supported by Auma India are:

- i) Akshay Patra mid-day meal scheme : Auma India provided funds for procuring a food distribution van. This is the 14th van provided by Auma. Besides this Auma also partially supports the cost of food in the schools near to its facility. Auma is supporting Akshay Patra for over 10 years.
- ii) Hasiru Dala : Hasiru dala is an organization focusing on the problems of the rag pickers. Auma India provided scholarships and educational kits to 41 children of rag pickers. Auma is supporting Hasiru Dala for past 3 years.
