AUMA India Quarterly Newsletter (Apr - Jun 2017)

## THINK AUTOMATION. THINK AUMA

The controlling centre behind all Industrial Valves

AUMA India is the Leader in the field of Electric Actuators and Valve Gearboxes for the automation of Industrial valves and dampers in the country. Be it power, nuclear, water, petroleum, cement or steel, AUMA India actuators are at work behind the scenes, controlling some of the most critical processes in industry.

### AUMA India Pvt. Ltd.

MARKETING  
ORDERS BAGGED

## AUMA India bags orders for TANGEDCO Ennore power project

AUMA India, the Leader in the field of Electric Actuation has been chosen to supply Actuators to the power project of TANGEDCO (Tamil Nadu Generation and Distribution Corporation Limited). This is a 2 x 660 MW coal-fired supercritical thermal power plant at Ennore SEZ.

## AUMA India products to be a part of Solar Park project, Chittapur, Karnataka

AUMA India bags the order for Solar Park Development Project, a 22 MWp solar based power unit at Chittapur Taluk in Gulbarga district for supplying 63 electro-mechanical actuators for the solar tracker project.

## AUMA India supplies actuators to Thermax Bataan, Philippines - Captive Power project from Biomass

AUMA India has supplied weather-proof electric actuators and gearboxes for the Thermax Bataan project - Philippines, a co-generation plant which is the first South East Asian power facility built and commissioned by Thermax.

## AUMA India bags the order for IOCL Haldia refinery project

AUMA India supplies AUMA Ex-proof Actuators with integrated interface for advanced MODBUS communication capabilities for IOCL Haldia refinery project of 0.5 million tons capacity addition planned at 7.5 million tons of the coastal refinery of IOCL.

## WVIB Group visited AUMA India, Bangalore

### WVIB Group visited during the month of March 2017

WVIB (Wirtschaftsverband Industrieller Unternehmen Baden eV), a think tank as well as a German Trade association from Schwarzwald AG visited AUMA India during the month of March 2017.

COURTESY: WVIB Group

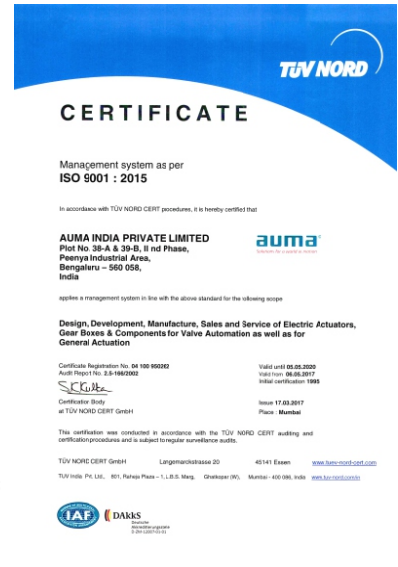

ISO 9001:2015

## Quality Management System

### AUMA India has successfully upgraded its QMS in accordance with the requirements of the newly revised ISO 9001:2015

During 2016, AUMA India Employees, and its suppliers/ vendors underwent an 'Awareness & Training programme' on ISO 9001:2015 Quality Management System. After that, audits were carried out by external as well as internal agencies for the conformance to ISO 9001 Quality Management System (QMS) and now, has been successfully upgraded in accordance with the requirements of ISO 9001:2015.

## National Safety Day 2017

### AUMA India celebrated National Safety DAY 2017

National Safety Day 2017 programme was conducted by AUMA India and prizes were distributed for the employees who participated in Safety Quiz event. AUMA India periodically assesses & reviews the status on Safety, Health and Environment by using various techniques such as Order & Cleanliness and Safety Audits. AUMA India conducted safety & first-aid campaign during the first week of March 2017 with both theoretical & practical sessions on new and useful information on industrial safety, including the role of employees during emergency situations.

## AUMA presents new actuator for continuous under water use

A new version of the AUMA SA multi-turn actuator is suitable for continuous underwater use, thus opening up new applications of electric actuators in water supply systems, hydro power plants, civil engineering constructions for water applications, and specific off-shore applications. Where water supply or sewer pipes run underground, actuators and valves are often installed in pits below ground level. In places where high water levels are a permanent risk, actuators designed for underwater use will operate reliably even if flooding persists.

A universal sealing system combined with comprehensive corrosion protection qualifies these actuators for underwater use. Double-sealed cable glands at the electrical connection, inner seals – some in pairs – on all housing covers, and a one-piece solid shaft effectively prevent the ingress of water.

AUMA electric actuators are very easy to install – they just require power supply and a signal cable. This turns them into a real alternative to hydraulic actuators. They are also characterised by low operating costs and are virtually maintenance-free. And they offer a clean and environmentally friendly solution, as no oil is used that might leak and contaminate the water.

SA actuators in sizes 07.2 to 16.2 are available for continuous underwater use. As standard, the actuators are qualified for up to 15 m head of water, with higher heads of water available on request.

All actuator settings including end position setting for travel and torque are non-intrusive via the AC actuator controls, with no need to open the actuator housing. The actuator controls are installed outside the flooded area, separate from the valve and actuator. Cable lengths up to 100 m can be achieved.

**CUSTOMER SERVICE & SUPPORT**

## AUMA India - In-house Customer Service Training Programme

In-house Customer Service Training Programme @ AUMA India during 20th - 22nd Apr 2017, which was attended by the delegates from various end-users & OEMs viz. BPCL Kochi, Jupiter Valves, KSSK Athani.

Customised Service & Product Training Programme for WEIR Minerals: AUMA India organised a Customised Service & Product Training Programme on 14th of Apr 2017 for WEIR Minerals, Bangalore staff members.

## AUMA India conducted 'Onsite Customer Service Training programme @ TPCIL, Nellore

A team of 30 staff members attended the Onsite Customer Training programme @ TPCIL, Nellore conducted by AUMA India during the first week of March 2017.

### AUMA India In-house Customer Service Training Programme Calendar

TRAINING START DATE	TRAINING END DATE
06-07-2017	08-07-2017
12-10-2017	14-10-2017
17-01-2018	19-01-2018
19-04-2018	21-04-2018
